

**IN THE CLAIMS**

Claims 1-15 (Canceled).

--16. (Currently Amended)      An information processing system comprising:  
receiving means for receiving an electronic mail containing electronic mail sender  
information;  
reading means for reading a lookup table including electronic mail account information  
and a music file corresponding to said electronic mail account information, wherein said music  
file has a title and an artist associated therewith; and  
retrieving means for retrieving said music file corresponding to said electronic mail  
account information of said electronic mail sender information received by said receiving means;  
and  
means, when the electronic mail has been received, for causing the retrieved music file to  
be reproduced and for causing a signal to be supplied to a display means representative of the  
respective title and artist such that the retrieved music file is reproduced simultaneously or  
substantially simultaneously with the display of the respective title and/or artist on a screen of  
said display means.--

--17. (Previously Presented)    The information processing system as claimed in claim  
16, wherein said electronic mail account information in said lookup table is an electronic mail  
sender account.--

--18. (Previously Presented) The information processing system as claimed as claimed in claim 16, wherein said electronic mail account information in said lookup table is a domain name in said electronic mail sender account.--

--19. (Canceled)

--20. (Previously Presented) The information processing system as claimed in claim 16, wherein said lookup table is set up in advance.--

--21. (Currently Amended) An information processing method comprising the steps of:  
receiving an electronic mail containing electronic mail sender information;  
reading a lookup table including electronic mail account information and a music file corresponding to said electronic mail account information, wherein said music file has a title and an artist associated therewith; and

retrieving said music file corresponding to said electronic mail account information of the received electronic mail sender information; and

causing, when the electronic mail has been received, the retrieved music file to be reproduced and causing a signal to be supplied to a display means representative of the respective title and artist such that the retrieved music file is reproduced simultaneously or substantially simultaneously with the display of the respective title and/or artist on a screen of said display means.--

--22. (Previously Presented) The information processing method as claimed in claim 21, wherein said electronic mail account information in said lookup table is an electronic mail sender account.--

--23. (Previously Presented) The information processing method as claimed as claimed in claim 21, wherein said electronic mail account information in said lookup table is a domain name in said electronic mail sender account.--

--24. (Canceled)

--25. (Previously Presented) The information processing method as claimed in claim 21, wherein said lookup table is set up in advance.—

26. (New) The information processing system of claim 16, wherein the respective music file includes a picture file associated with the respective artist, and wherein the causing means causes the picture file to be displayed on said display means when the electronic mail has been received.

27. (New) The information processing method of claim 21, wherein the respective music file includes a picture file associated with the respective artist, and wherein the causing step causes the picture file to be displayed on said display means when the electronic mail has been received.
